

# ConquerorTheCrown Virtual Incubator

From idea to impact — we're with you at every step.

## Introduction from the Founder

At ConquerorTheCrown, our mission is clear: to support individuals with bold ideas but limited access to capital, networks, or guidance. These are the underrepresented builders, the first-time founders, the dreamers the world often overlooks.

We believe that brilliance is everywhere — but opportunity is not. To close that gap, we've launched the ConquerorTheCrown Virtual Incubator, a borderless platform built to give ambitious individuals the tools, support, and resources they need to transform their ideas into impactful ventures.

## A Launchpad Without Borders

The ConquerortheCrown Virtual Incubator is designed to be fully remote and accessible globally. Whether someone lives in a major city or a rural town, they should have access to world-class incubation — without relocation, gatekeeping, or financial barriers.

Our incubator was built to democratize access. It is designed for early-stage founders who are rich in ideas but underserved in support.

### The Problem We're Addressing

Far too many talented founders never get a chance to begin because of structural disadvantages.

Most incubators cater to well-networked individuals from elite institutions.

Access to capital is concentrated in a handful of regions and communities.

Early-stage founders lack affordable access to tools, mentorship, and technical infrastructure.

This results in countless missed opportunities — not just for individuals, but for the global innovation ecosystem.

## Our Solution

The ConquerortheCrown Virtual Incubator removes these barriers by offering:

### 1. Startup Resources and Credits

Over \$700,000 in credits and benefits, including:

- Cloud infrastructure from top providers

- No-code/low-code development platforms

- Design, analytics, CRM, and marketing tools

These resources allow founders to prototype, test, and iterate — without the burden of upfront costs.

## 2. Mentorship and Community

We pair founders with experienced mentors across industries, including business, technology, fundraising, and product design.

Participants gain access to:

- Regular office hours and Q&A sessions

- Masterclasses led by subject-matter experts

- Peer founder circles and curated networking events

- Guidance on fundraising, go-to-market strategies, and growth

## 3. Global Accessibility

Our entire incubator operates virtually, ensuring access to anyone with a computer and ambition — regardless of geography, background, or economic status.

## Our Track Record

As of 2025, ConquerortheCrown has:

- Supported over 100 emerging founders

Provided \$31,500 in direct, equity-free grants

Partnered with platforms like Microsoft for Startups, Bubble, MongoDB, and more

Developed a growing global community of early-stage entrepreneurs

## Our 12-Month Goals

We are currently scaling our operations to:

Support 300 new startups

Distribute \$1,000,000+ in total benefits and resources

Help at least 50 teams launch MVPs and reach product-market fit

Facilitate over \$2 million in capital raised by incubated founders

## Why We Are Seeking Your Support

To meet our next phase of growth, we are seeking philanthropic and investment partners to help us expand our impact.

We aim to raise:

\$250,000 in philanthropic support

To enhance platform delivery, launch global outreach programs, and offer direct equity-free funding to founders in need.

Strategic partnerships and sponsorships

To scale our mentor network, host virtual demo days, and ensure best-in-class technical infrastructure.

## How You Can Make a Difference

By supporting the ConquerorTheCrown Virtual Incubator, you will:

Empower overlooked entrepreneurs with meaningful resources

Help reduce inequality in global innovation

Contribute to a more inclusive, diverse startup landscape

Create ripple effects in job creation, technological progress, and social impact

## Our Commitment

We are committed to full transparency, impact measurement, and sustainable growth.

Our goal is not only to help founders succeed — but to build a system where success is no longer dependent on privilege.

Sincerely,

Abhinav Sharma  
Founder & Director
